

## **ACTIVITIES REPORT – SEPTEMBER 2013 QUARTER**

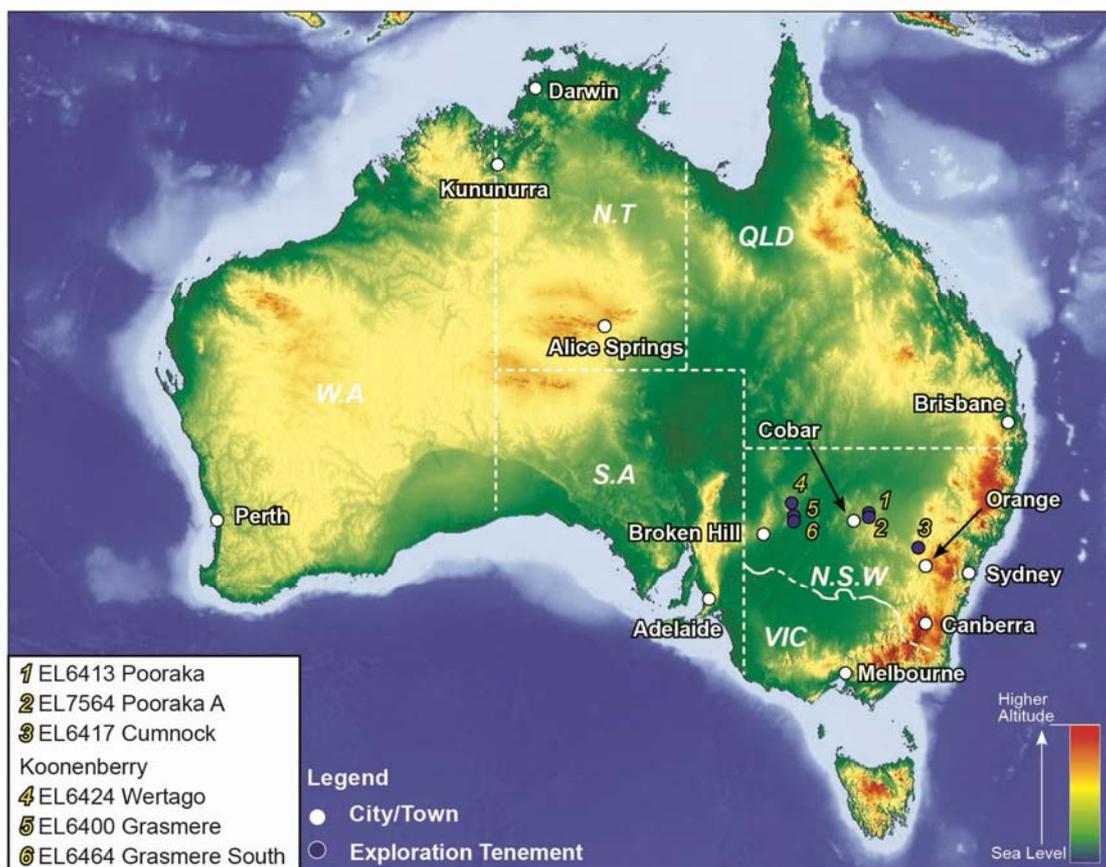

### **SUMMARY**

#### **Corporate**

- On 26th September, the Company raised \$300,000 by private placement of 10,000,000 fully paid ordinary shares at \$0.03 per share to fund exploration.
- Mr Qian became a substantial shareholder with 11.8% of the Company's issued capital and joined the Board with special responsibility for exploration and mining projects.

#### **Exploration**

- The Koonenberry ELs 6464 and 6424 have been renewed after the quarter-end with 50% area reduction, and EL 6400 with no reduction. Planned work for the next 6 months:
  - follow up of prospects and anomalies on ELs 6400 and 6464;
  - a gravity survey over Koonenberry EL 6424 that covers the Wertago copper diggings and Nutherungie silver field; and
  - RC percussion drilling of suspected WNW extensions to the Grasmere-- Peveril (Cu-Zn-Ag) line of lode.
- Cumnock EL 6417, near Orange, has been renewed with 50% area reduction. The renewed area near Gumble remains a prime target for skarn-type Cu-Zn-Sn-Ag-Au deposits. Several targets planned for testing by RC percussion drilling in early 2014.
- Cobar EL 6413 (Pooraka) has been renewed with a 50% area reduction following a technical re-evaluation that upgraded its prospectivity subsequent to a prior decision to relinquish that area. EL 6413 joins EL 7564 (Pooraka A) and both are proximal to, and on strike from, the Mt Boppy gold-copper deposits.

### Licence Locations in New South Wales, Australia

#### CORPORATE

On 26 September 2013, the Company issued 10,000,000 fully paid ordinary shares at \$0.03 per share raising \$300,000. The shares were placed with Mr Qian who became a substantial shareholder with 11.8% of the Company's issued capital. Mr Qian joined the Board with special responsibility for exploration and mining, particularly to oversee the use of the capital raised for exploration in New South Wales exploration licences.

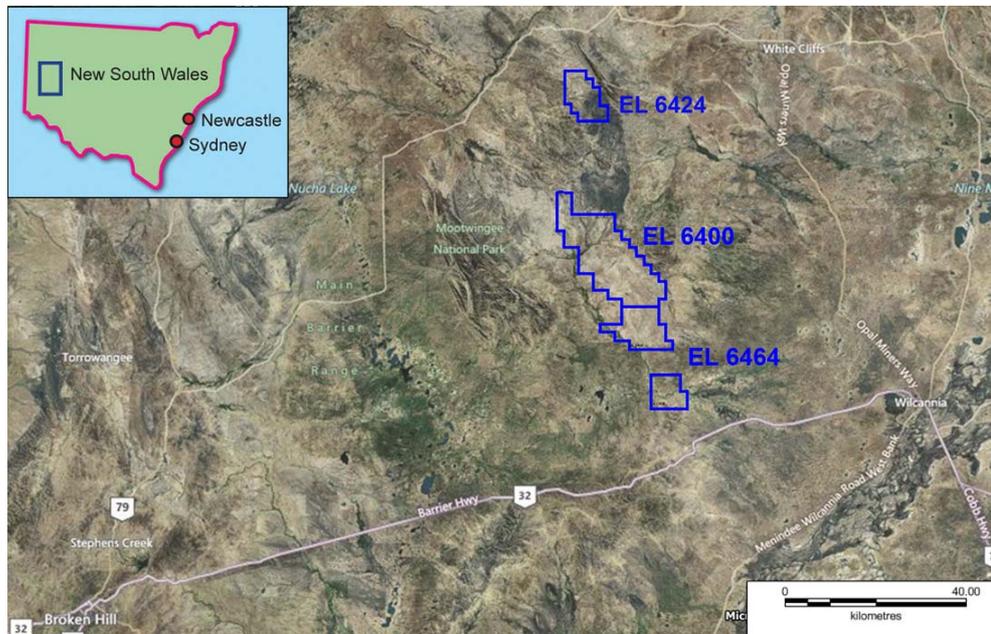

#### ACTIVITIES IN THE KOONENBERRY BELT – Copper-Zinc-(Silver) and Gold Exploration

##### ELs 6400, 6464, and 6424 - NSW (100%)

The Company holds a 100% interest in 3 ELs covering a total area of 510 sq kms in the highly prospective and under-explored Koonenberry Belt in Western NSW, near Broken Hill. After the quarter-end the DPI confirmed renewal the ELs 6424 & 6464 with compulsory 50% area reduction, and EL 6400 was renewed with no area reduction.

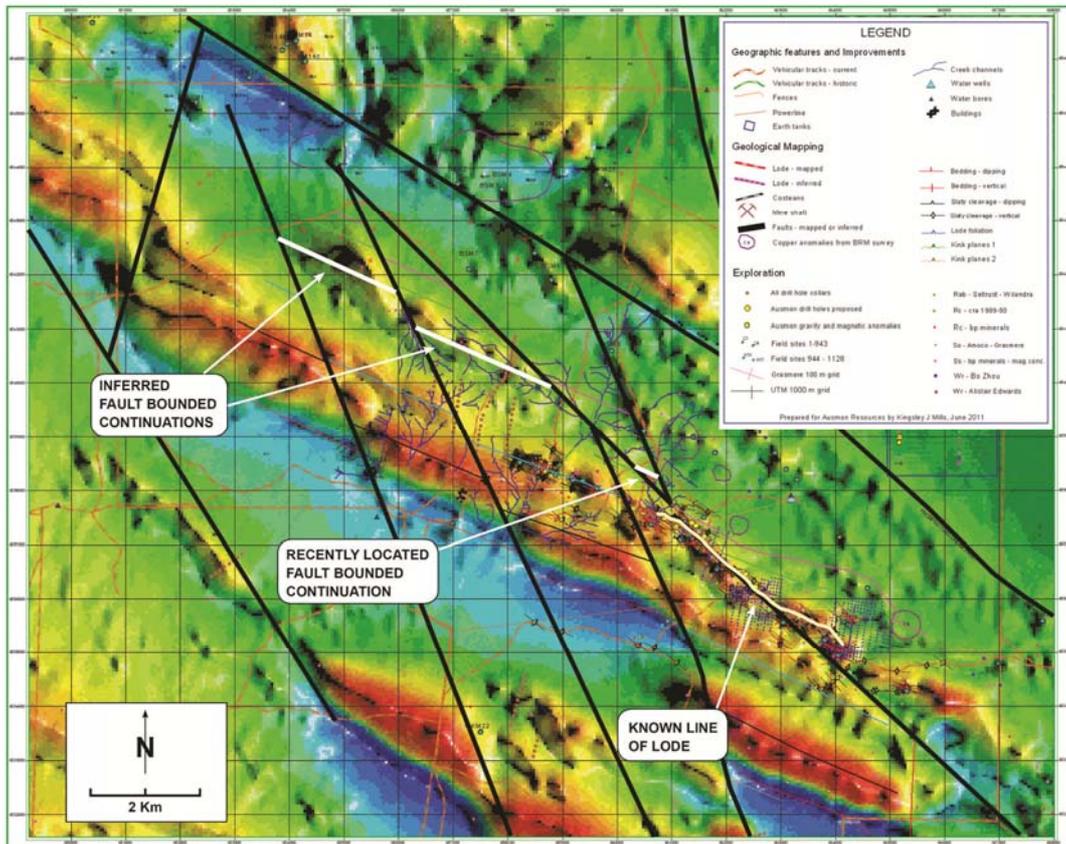

EL 6400 is of principal interest as it contains the Grasmere- Peveril Cu-Zn-(Ag) deposits, which contain a significant indicated and inferred JORC compliant resource of 5.75mt @ 1.03% Cu, 0.35% Zn, 2.3g/t Ag and 0.05g/t Au ( Inferred: 2.73 mt grading 0.9% Cu, 0.4% Zn, .04 g/t Au and 2.05 g/t Ag. Indicated : 3.02 mt grading 1.15% copper, 0.3% Zn, 0.06 g/t Au and 2.53 g/t Ag). In late 2011 detailed (1:1000 scale) fault delineation and lithological mapping led to the discovery of a probable new, south-east displaced, fault bounded slice of the line of lode, roughly one km north of the Company's June 2011 drilling targets. Lithological, fault line, and aeromagnetic evidence also pointed to further extensions to the west-north-west. Mapping and prospecting has continued to locate new features, including narrow, late stage, cross-cutting veins presenting at surface as silicified ironstones. Portable XRF (Niton) field testing of these has detected the presence of Cu and Zn, as is also the case in Grasmere-Peveril line of lode. The expectation is that the recently located line of lode will turn out to be wider and/or more Cu rich than at Grasmere or Peveril. In July 2013, a field trip was made to check the strongly suspected WNW extension which express at surface as lines of gypsum bearing sink holes associated with high Cu soil anomalies. The current proposal is to test these targets at depth in 3 locations (see Figure 2) using close spaced RC-percussion drilling.

In the case of EL 6424, which covers the Wertago copper diggings and the Nutherungie silver field, a detailed (250 station) gravity survey is now planned for early 2014. The silver field is suspected to represent the epithermal cap above concealed porphyry (Cu-?Mo-Au) system, which should express as gravity high. Regional data have already revealed a broad gravity high over the silver field. This high needs to be honed in more detail to assist with selection of a deep drill target. The Company has also asked the DPI to contribute to half the cost of a deep diamond drill hole and that proposal is being considered.

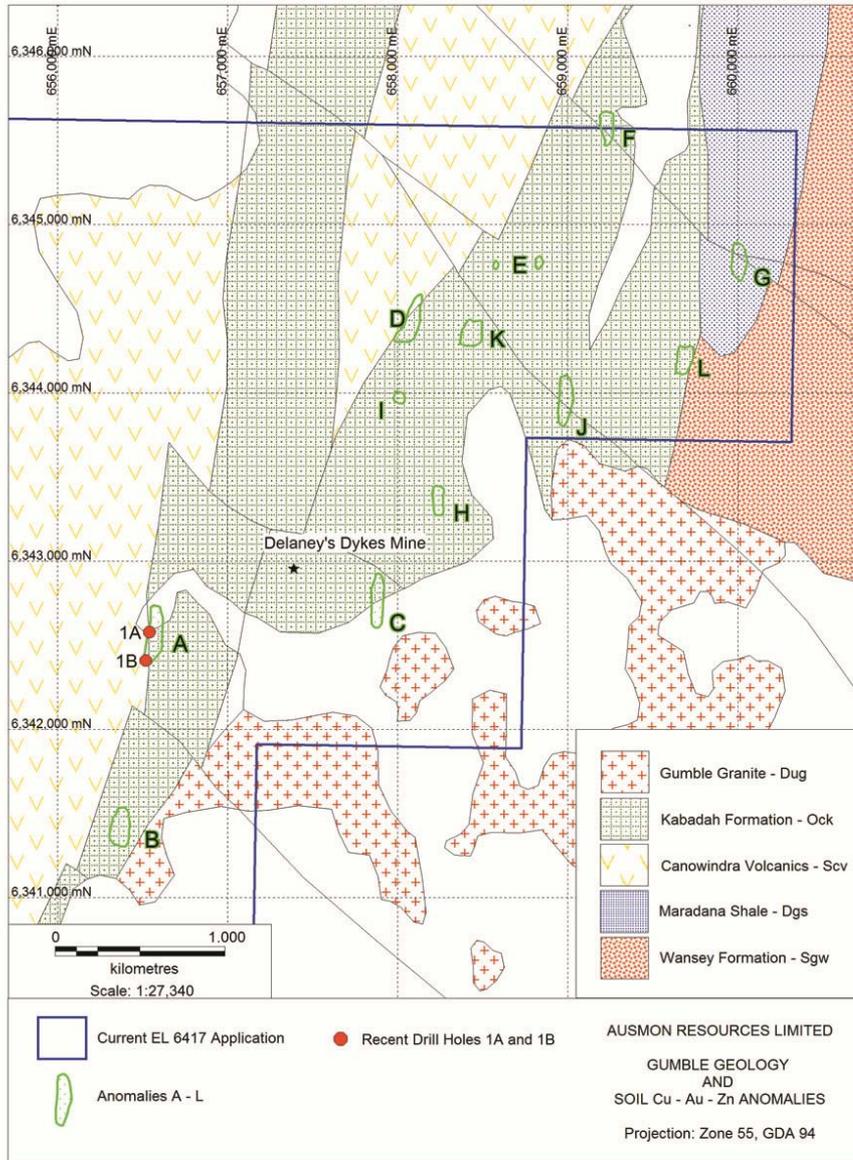

**Figure 2 - EL 6400 – Probable WNW Extension to Grasmere Peverill Line of Lode**

**ACTIVITIES NEAR ORANGE- Gold, Silver and Base Metal Exploration  
EL 6417-Cumnock- NSW (100%)**

Drilling in prior periods considerably upgraded the potential of the Gumble sub-area within EL 6417. In particular “Anomaly A” (2 RC holes drilled in August 2011) was noted to be part of an extensive skarn system (caused by mineralising fluids from granitic intrusions reacting with limestones and associated country rocks) which is evident over 500+ metres. Elements concentrated are the same as those noted in the nearby (historic) Delaney’s Dyke diggings i.e. Cu, Zn, Ag-Au, and Sn. Another 11 similar anomalies, labeled B to L, remain to be tested by RC percussion drilling—see Figure 3. Most targets occur within the prospective Kabadah Formation.

The DPI has confirmed renewal of EL 6417 with 50% area reduction to 15 May 2015. Since mineralization is of the skarn type, the presence of magnetite is expected and a detailed analysis of historic aeromagnetic data is underway to hone 2 or 3 good targets for RC percussion drilling in early to mid-2014. To date only Anomaly A has been drilled and that work yielded very encouraging results (see earlier reports).

**ACTIVITIES NEAR COBAR - Gold, Silver and Base Metal Exploration  
ELs 6413 and 7564 – NSW (100%)**

At the end of the last financial year, the Company had written off all accumulated expenditure within EL 6413 and had decided not to pursue exploration in that EL. However, after a technical re-evaluation of data resulting in an upgrade in prospectivity, the EL 6413 has been renewed with a 50% area reduction until May 2015.

EL 6413 joins EL 7564, located at Pooraka, 50 km east of Cobar, with both containing several drill ready gold and base metal targets gleaned from the Company's prior periods of exploration work. Much of these two highly prospective ELs is hidden beneath deep magnetic overburden, and the Company is currently seeking joint venture partners to participate in funding a Sky-TEM geophysical survey to locate conductors with signatures resembling those seen at Cobar and at the nearby Canbelego gold-copper-zinc mine.

(The information in the report above that relates to Exploration Results is based on information compiled by Dr Pieter Moeskops, the principal of Agaiva Holdings Pty Ltd and a member of The Australasian Institute of Mining and Metallurgy.

Dr Moeskops has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Moeskops consents to the inclusion in this report of matters based on his information in the form and context in which it appears.)

## Appendix 5B

### Mining exploration entity and oil and gas exploration entity quarterly report

#### Changes in interests in mining tenements and petroleum tenements

	Tenement reference and location	Nature of interest (note (2))	Interest at beginning of quarter	Interest at end of quarter
6.1	Interests in mining tenements and petroleum tenements relinquished, reduced or lapsed			
6.2	Interests in mining tenements and petroleum tenements acquired or increased			

#### Issued and quoted securities at end of current quarter

Description includes rate of interest and any redemption or conversion rights together with prices and dates.

	Total number	Number quoted	Issue price per security (see note 3) (cents)	Amount paid up per security (see note 3) (cents)
7.1	<b>Preference securities</b> (description)			
7.2	Changes during quarter (a) Increases through issues (b) Decreases through returns of capital, buy-backs, redemptions			
7.3	<b>+Ordinary securities</b>	84,499,125	84,279,125	
7.4	Changes during quarter (a) Increases through issues (b) Decreases through returns of capital, buy-backs	10,000,000	10,000,000	\$0.03
7.5	<b>+Convertible debt securities</b> (description)			

+ See chapter 19 for defined terms.

## Mining exploration entity and oil and gas exploration entity quarterly report

7.6	Changes during quarter (a) Increases through issues (b) Decreases through securities matured, converted				
7.7	<b>Options</b> (description and conversion factor)	One ordinary share per option  33,750,000	33,750,000	Exercise price  \$0.80	Expiry date  30 June 2014
7.8	Issued during quarter				
7.9	Exercised during quarter				
7.10	Expired during quarter				
7.11	<b>Debentures</b> (totals only)				
7.12	<b>Unsecured notes</b> (totals only)				

## Compliance statement

- 1 This statement has been prepared under accounting policies which comply with accounting standards as defined in the Corporations Act or other standards acceptable to ASX (see note 5).
- 2 This statement does give a true and fair view of the matters disclosed.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

+ See chapter 19 for defined terms.

For personal use only

## Appendix 5B Mining exploration entity and oil and gas exploration entity quarterly report

---

- 2 The “Nature of interest” (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
