for Rare Earth Elements Exploration**

The aircore drilling program at Parrakie EL 6795 has commenced for a total of 800 metres with each hole planned to be drilled up to 20m in depth and the final end of hole to be decided by the site geologist. The drilling is planned for completion in one week subject to weather and unforeseen events.

For this initial program, the drilling along roadside verges with local council approvals minimises disruptions on private land and aims to identify areas of potential for future more extensive drilling programs. The drilling sites have been selected based on geological work carried out to date by the Company and the information obtained from pXRF scans and laboratory assays for Rare Earth Elements of a selection of core and drill chips from historical drilling that were available at the SA Mines Department.
